SID - ICAO
MODOR TWO RNAV (GNSS) DEPARTURE

AERODROME ELEVATION: 14'
TRANSITION LEVEL: FL065
TRANSITION ALTITUDE: 5000'

JULIANA APPROACH: 128.950 (PRIMARY), 118.700
JULIANA TOWER: 118.700

PRINCESS JULIANA INT (TNCM)
SINT MAARTEN

CHANGES: Freq format, mag var, ANG/BY/PJE NDBs removed, TIKAL now ZPATA, path terminators, initial climb Notes 3&4, TAR1/TAR2 now TF-R3/TF-R4.

INITIAL CLIMB

1. This departure requires a minimum 1200' ceiling and 2.8 NM visibility to see and avoid the mountain 2.8 NM East of take-off end Rwy 10.
2. Close-in obstacles include:
   A. 602' hazard beacon 6227' from DER, 620' left of centerline
   B. 1118' hazard beacon 9224' from DER, 2044' right of centerline.
3. The applicable procedure design gradient (PDG) is determined by the visual track flown. The Aerodrome Obstacle Chart - ICAO Type A contains a map displaying the location, elevation and PDG required by the highest mountain points. Operators will maneuver visually over lower terrain to minimize the necessary PDG.
4. As soon as practicable turn right direct MODOR and follow the instructions below, which may be superceded by radar vectors.

ROUTING

VIA	ROUTE
DANDE	Climb direct MODOR*, turn right direct DANDE.
ELOPO	Climb direct MODOR*, turn left direct ELOPO.
GOUDA	Climb direct MODOR*, turn right direct GOUDA.
JUICE	Climb direct MODOR*, turn right direct JUICE.
MNOLO	Climb direct MODOR*, turn left direct MNOLO.
TRNKY	Climb direct MODOR*, turn left direct TRNKY.
ZPATA	Climb direct MODOR*, turn left direct ZPATA.
	* Cross MODOR at/above 4000'. If unable advise ATC.

NOTES

1. Direct distance Rwy 10 threshold to MODOR: 10.1 NM
2. MODOR full coordinates: N17 52 27.98 W063 04 55.00
3. Path terminators: DF to MODOR, the other segments TF.
